

Magnetic Maze

Materials Needed:

Small wooden dowel rods
Magnets strong enough to go through paper
Cardstock
Large Paper Clip (or other small metal item)
Super glue

Prepwork:

Draw large “paths” of letters on cardstock paper with dots for start and arrows to show stroke sequence.

Glue magnet to end of dowel rod.

Task:

Instructor gives the student cardstock with a letter “path” and places a paper clip at “start” point.

Placing a dowel with magnet on the tip under the paper, students move the paper clip along the path of the letter.

Students switch with peers to attempt several letters.

Student Goals:

Improve visual motor integration
Improve motor planning
Improve kinesthetic awareness
